

PROJECT FEASIBILITY STUDY: Make It Simple!

3-4 June 2019  InterContinental Bangkok

COURSE OVERVIEW

This comprehensive two-day training course has been specially designed and will explore key components to making investment decisions. We will define and detail the sources of the information required to establish a business case and determine which projects should be invested in and which should be avoided.

The course will cover the information needed to understand the content and complexity of a project and techniques to determine its risk profile. The other side of the investment decision is the value of the benefits to be gained from completing the project.

The course will also cover and discuss projects in various sectors e.g. Infrastructure, Financial, IT, Energy, etc. Practical case studies will be used throughout the two days to allow you to apply tools and techniques.

By attending this training course, you will gain insights into techniques, strategies and much more for your successful decision-making in investment projects.
